## Symons® Steel-Ply® concrete forming system

is the most productive, pre-engineered, reusable, factory-built concrete forming system in use today.

Engineered for maximum versatility, it can be used to form virtually any concrete structure.

And all you need is a hammer.

### FEATURES & BENEFITS

- 47k N/m<sup>2</sup> allowable pressure
- 12.7mm 100/30 HDO standard plywood face
- No special tools required - just a hammer
- The same form can be handset or gang-formed
- Only one type of connecting hardware is required - Wedge Bolts
- Plywood is edge sealed to repel moisture and prevent delamination
- Durable form where frames last 20 years or more with proper care
- Commonly used in carpenter training classes

### PRODUCT DATA

- Panels weigh approximately 24.4 kg/m<sup>2</sup>
- Over 100 standard panel and filler sizes available
- Standard heights of 600mm to 3m in 300mm increments
- Standard widths from 100mm to 600mm in 50mm increments
- Filler widths of 25mm and 50mm are also available
- 750mm wide Adjustable Column and Pilaster forms
- Can be hand-set or put into larger gangs
- Available for rent or purchase
